Why choose Flawless?

A floor should look right, feel right and suit the way you use your space. We help you explore colours and finishes, then match the coating system to your project.

Colour choice

Easy-care finishes

System options

Traction options

Lasting appeal

FOR HOMES, BUSINESS & INDUSTRY

- ✓ Home garages
- ✓ Living areas
- ✓ Covered outdoor spaces
- ✓ Retail stores & showrooms
- ✓ Offices & shared spaces
- ✓ Warehouses & workshops
- ✓ Commercial fit-outs
- ✓ Hospitality venues
- ✓ Storage & utility areas
- ✓ Project-specific applications

The coating, texture and topcoat should be selected for the substrate, traffic, weather exposure and cleaning needs of each area.

Everyday strength. Flawless style.

Build your floor

Bring the look and the practical details together. Work through these four choices to shape a finish for your space.

01 Choose your finish

Explore flake, stone-inspired, metallic, solid colour, quartz or a textured finish.

02 Select your colour

Choose the colour or blend. Review the base coat where it contributes to the finished look.

03 Match the system

Consider the concrete, moisture, traffic, sunlight, cleaning and traction requirements.

04 Plan your project

Bring your shortlist, approximate floor area and key requirements together to discuss the next steps.

Start with the look. Refine it for real life.

From everyday spaces...

The right floor connects the whole space, bringing the cabinetry, furniture, light and outdoor surroundings together.

...to an extraordinary finish.

Residential

A colour palette that works with your home.

Commercial

A finish that supports the way the space is used.

Industrial

A system chosen for the demands of the site.

Choose your finish with confidence

Balance the look you love with the way the space is used. These details help turn a colour shortlist into a practical flooring plan.

Look at the whole space

Take cues from your cabinetry, walls, furniture and natural light. A quieter floor can let other finishes stand out; a stronger blend can become a feature.

Choose the feel as well as the colour

Base coat, flake density, pigment, texture and sheen all shape the result. Consider the complete finish alongside traffic and cleaning needs.

Allow for changes in light

Colour can look different in daylight and under artificial lighting. Printed and screen swatches are a guide; a physical sample helps confirm the final appearance.

Agree on the project details

Confirm product availability, floor area, substrate condition, colour references, preparation and system suitability before the project begins.

Colour names and combinations follow the supplied catalogue. Custom blend pages show examples rather than standard premixed products. Lifestyle images illustrate design possibilities and do not specify an exact colour or system.

Your floor, on paper

Use this page to capture your ideas, then visit our website to discuss the next steps for your project.
